

## **COP 4331 Section 003 – Spring 2026**

### **Group 7**

### **Meeting Notes**

**Date: January 23, 2026**

**Location: Library**

1. Confirmed that in-person meetings will be held every week after class. Location and time to be determined depending on labs (coordinate location/time via discord).
2. Went over the draft web app wireframe diagram and functional specifications developed over the previous week.
3. Reviewed tentative schedule created over the previous week and proposed action items (see below) for the upcoming week.
4. Action Items:
  - (JC and Adam) Get comfortable with PHP syntax and SwaggerHub testing. Create login API for prototype testing of login page during next in-person meeting (1/30). Start on API's related to contact list "add", "delete", "update", and "search" functions. Coordinate with database designer (Leo) as needed.
  - (Leo) Create "Users" table for small project using new user/database.
  - (Andrew and Phillip) Create non-formatted (i.e. minimal css) login page to be used for testing login API in next week's in-person meeting.
  - (Andrew and Phillip) Get comfortable with javascript and DOM.
  - (Andrew and Phillip) Assess the feasibility of using Bootstrap for the small project.
  - (Phillip) Update wireframe diagrams and functional specifications to incorporate items discussed during the meeting.
